

NGUYEN HUU THIEN CUONG

Java Backend Developer · Ho Chi Minh City, Vietnam

(+84) 889724077 · cuong.nguyenhuuthien@gmail.com · github.com/nhtc2005 · linkedin.com/in/cuongnguyenhuuthien

PROFESSIONAL SUMMARY

Third-year Computer Science student seeking a Backend Developer Internship, with hands-on experience in Java and Spring Boot. Passionate about building scalable backend services, RESTful APIs, and writing clean, maintainable code.

EDUCATION

Ho Chi Minh City University of Technology - VNU-HCM
Bachelor of Computer Science
GPA: 3.7/4.0

Aug 2023 – Oct 2027 (Expected)

PROJECTS

Smart Home System

Jan 2026 – Apr 2026

Backend Developer

[GitHub](#)

- Designed and developed backend services for smart home device management using **Java** and **Spring Boot**
- Implemented secure authentication and role-based authorization using **Spring Security** and **JWT**
- Integrated **MQTT** protocol for real-time IoT device communication and event-driven message handling
- Built real-time device monitoring and status synchronization using **STOMP over WebSocket**
- Designed and optimized **PostgreSQL** schema for users, devices, automation rules, and device activity tracking
- Containerized backend services using **Docker** for consistent development and testing environments

Supermarket Management System

Sep 2025 – Dec 2025

Backend Developer

[GitHub](#) / [Live Demo](#)

- Developed backend services and RESTful APIs for warehouse operations, including product import/export, stock management, inventory tracking, and supplier workflows using **Java** and **Spring Boot**
- Implemented role-based access control using **Spring Security** and **JWT** for warehouse staff
- Optimized database schema and queries for inventory management using **MySQL**
- Containerized and deployed the full system using **Docker** on **AWS EC2** with Nginx reverse proxy and custom domain configuration

Online Learning Platform Backend

Sep 2025 – Dec 2025

Backend Developer

[GitHub](#)

- Developed backend features for quiz and test management using **Java** and **Spring Boot**
- Designed and implemented a question bank system supporting multiple question types for quiz and test creation, and assessment management
- Developed RESTful APIs for quiz and instructor workflows
- Designed and optimized relational database schema for questions, quizzes, tests, and user roles using **SQL Server**

TECHNICAL SKILLS

Programming Languages Java, Python, JavaScript

Backend Spring Boot, Spring Security, Spring Data JPA, RESTful APIs, JWT, WebSocket

Databases MySQL, SQL Server, PostgreSQL

DevOps Docker, AWS EC2, Nginx, Linux (Ubuntu)

Tools Git, GitHub, Postman, Maven
